MARKET ACTIVE AND BUOYANT

Marked Strength in Chesapeake and Ohio One of the Features.

NEW YORK, May 2.—There was an active rebound in prices of stocks to-day to the highest level of the week for those which have been most conspleu-

those which have been most conspicuous in the movement and which were mostly in the transcontinental group. The movement was a continuance of the buoyancy when the market closed yesterday, and was lacking in the special news developments to explain it. Advances were practically wiped out in the final hour.

St. Paul activity was resumed to impress speculative sentiment. There was marked strength in Chesapeake and Ohio, which was also unexplained. The prospect of the bank statement was hopeful. A favorable influence in the market was the confidence expressed by prominent financiers newly returned from Europe in the good prospect of growing interest by European

returned from Europe in the good pros-pect of growing interest by European capital in American investments. Money was reported somewhat firmer. One factor causing this was the increased demand from stock commis-alon houses for funds which accom-panied the increase in the value of stocks. Sales, 421,600 shares.

NEW YORK, May 2.—Money on call nominal. Time loans firmer; sixty days, 2 3-4 \$\tilde{w}\$3 and ninety days, 3 per cent; six months, 3 3-4. Prime mercantile paper, 4 \$\tilde{w}\$4 1-2 per cent. Sterling exchange steady, with actual business in bankers' bill at \$\frac{3}{4}.8590 \tilde{w}\$4.87 for demand, and at \$\frac{4}{4}.8440 \tilde{w}\$4.8450 for sixty days. Commercial bills, \$\frac{4}{4}.84 1-4 \tilde{w}\$4.84 3-8. Bar silver, 52 7-8. Mexican dollars, 47.

NEW ORLEANS, May 2.—COTTON—Stots were firm with prices unchanged; middling, 3 15-15c.; sales were 1,100 bales on the spot and 400 to arrive. Futures opened steady, 4@\$ points below the close yesterday, which was about as due on the cables. Following the opening the market experienced a quick recovery that carried the prices of May up to 3.37, which were the figures at which that option stood at the close. While the advance was largely due to manipulation, the reports of damage due to the young crop by the recent frost allowed the companies were also a large built-market factor.
